to find out.

CURBELL
CURBELL PLASTICS, INC.

Curbell Plastics is committed to providing machinists and fabricators the very best plastic sheet, rod, tube, films, adhesives, sealants, tapes, prototyping materials, and machined parts along with comprehensive technical support and customer service. We have over 65 years of experience in the plastics industry and we look forward to using that expertise to meet your material needs.

Curbell Plastics will host a FREE Seminar at Eastec on May 25th

“New Metal Detectable, FDA Compliant Plastics for Packaging, Food, and Pharmaceutical Machinery”

Food and pharmaceutical products are manufactured using automated machinery constructed from metals and plastics. One problem facing these industries is that plastic particles from production machinery can contaminate food or drugs and contaminants consisting of traditional plastics can't be detected using metal detection equipment.

Curbell Plastics, Inc. and Röchling Engineering Plastics are proud to introduce two new grades of metal-detectable, FDA-compliant plastics. Sustarin® C MDT acetal and Polystone® M MTD UHMW are available in sheet and rod stock that can be fabricated into machinery wear surfaces. These polymers are engineered to be sensed by standard metal detectors. This short presentation will cover the properties and applications for these two new plastic materials.

Applications for these materials include:

- Star Wheels
- Guide Rails
- Timing Screws
- Wear Strips
- Bushings
- Bearings
- Idler Sprockets
