CURBELL
CURBELL PLASTICS, INC.

Introduction

Sheffield Plastics Inc.

Sheffield Plastics was founded in 1949 as a producer of high quality plastics products. Today, with over fifty years of experience in the industry, Sheffield has grown to become a recognized leader in high performance plastics, supplying materials for architectural, industrial, commercial, and aerospace applications.

Together with its European affiliate, Sheffield Plastics is a global leader in producing polycarbonate sheet in the world. Wherever high performance glazing materials are required, Sheffield has the technology to fit the application.

None Tougher

Sheffield Plastics polycarbonate sheet is produced under rigid quality control specifications, meeting ISO certification guidelines for both plants and processes. Polycarbonate resins supplied by Bayer, combined with the latest in production technology, assure that the physical properties of MAKROLON® polycarbonate sheet will meet or exceed the performance characteristics of any directly competitive product on the market today.

MAKROLON® Polycarbonate Sheet is Clearly the Right Choice

How can you tell if polycarbonate is the right choice for you? It's simple! Only polycarbonate can offer the ideal combination of impact strength, cost effectiveness, and energy efficiency. No glazing alternative can surpass MAKROLON® polycarbonate sheet for superior all-around performance. It's the right choice for almost any demanding glazing application.

MAKROLON polycarbonate sheet is as clear as glass and hundreds of times stronger. It's also many times stronger than acrylic sheet—offering a margin of safety that no other clear glazing material can beat. With its inherent design flexibility, MAKROLON polycarbonate sheet can be cut or cold-formed on-site during installation, without the preforming and fabrication associated with glass or acrylic. It is lightweight and requires less structural support than all-glass systems, saving additional time and labor costs. Its durability and energy efficiency add up to long term cost savings. From skylights and barrel vaults to educational and institutional glazing, the question is not why, but where polycarbonate?

Built to Perform

- Transportation Glazing
- Barrel Vaults
- Covered Walkways
- Privacy Glazing
- Institutional Glazing
- Skylights
- Storefronts
- Factory Overglazing

Don't let material limitations compromise your design creativity. MAKROLON polycarbonate sheet is designed to perform in a wide range of applications and meets all standard architectural specifications and codes.

Impact Protection

Unsurpassed by any clear glazing product on the market, MAKROLON polycarbonate sheet is hundreds of times stronger than plate glass and many times stronger than acrylic. This tough, long lasting material offers attractive protection in areas subject to high traffic, vandalism or burglary. It even withstands natural forces like severe wind, hail, and snow storms. In fact, MAKROLON polycarbonate sheet meets stringent state mandates for hurricane resistant glazing materials.

Design Latitude

MAKROLON polycarbonate sheet is extremely ductile. It can be cut on-site from flat sheet or cold-formed into curves that would be impossible to construct with laminated glass or acrylic. Forget about costly factory preforming and fabrication. With MAKROLON polycarbonate sheet, you can create cost effective, distinctive structures that feature dramatic expanses of curved glazing.

Cost Efficiency

The unique combination of lightweight (half the weight of glass) and high strength inherent in MAKROLON polycarbonate sheet allows designs that require less structural support. Since MAKROLON polycarbonate sheet can be cut and cold-formed on-site, you save time and money that would normally be dedicated to preinstallation techniques like oven bending. MAKROLON polycarbonate sheet is much more durable than other material options. The cost of replacement becomes a less immediate (and less costly) concern.

Energy Efficiency

MAKROLON polycarbonate sheet is a superior insulating material when compared to equivalent thicknesses of glass. Double-glazing and overglazing offer even more energy savings. Overglazing with a patterned grade of MAKROLON polycarbonate sheet adds visual security and enhances the appearance of industrial and commercial sites.

Light and Energy Transmission

By allowing the transmittance of up to 90 percent of solar energy and 88 percent of visible light, clear MAKROLON polycarbonate sheet is an excellent glazing material for a wide range of applications where clarity is essential. MAKROLON polycarbonate sheet is also available in gray and bronze tints to help control heat gain, and provide a variety of privacy patterns for obscure glazing requirements.

The None Tougher Polycarbonate Glazing Sheet

MAKROLON® *Polycarbonate Glazing*

Think of all the places where you wish you could have used glass or acrylic in your designs, but could not due to the environment, building location, or material limitations. Now think of the demanding applications where glass and acrylic have been tried and failed; schools, psychiatric facilities, subways, bus shelters, etc. These sites are increasing because of violence and vandalism. Add applications where other plastics didn't rise to the challenge and your list of failures grows long. Now try MAKROLON polycarbonate sheet and turn failed designs into reality.

The family of MAKROLON polycarbonate sheet glazing products offers superior durability, unmatched design flexibility, and structural integrity that easily surpasses laminated glass and acrylic alternatives. When considering total life cycle costs, MAKROLON polycarbonate sheet comes in several grades to suit your every performance requirement: MAKROLON® GP polycarbonate sheet for general glazing and industrial applications; MAKROLON® SL polycarbonate sheet for increased UV protection and MAKROLON® AR polycarbonate sheet when abrasion resistance, weather resistant, impact strength, and graffiti removal are essential.

Clearly The Right Choice

MAKROLON® GP General Purpose Glazing Polycarbonate Sheet

For general purpose applications that require superior impact protection without additional abrasion and UV resistance, MAKROLON GP polycarbonate sheet is everything you need. Available in clear, colors and privacy patterns, MAKROLON GP polycarbonate sheet is a high performance, all purpose glazing material that is both durable and cost effective. This performance is backed by a comprehensive warranty against breakage.

MAKROLON® SL
MAKROLON® AR

Enhanced weatherability
for the most demanding
outdoor environments

MAKROLON® Polycarbonate Sign Products Offer Outstanding Resistance to Sunlight

MAKROLON® SL SunLife Polycarbonate Sheet

Prolonged exposure to the sun can weather even the most durable of surfaces. In the past, acrylic was often chosen for plastic glazing applications because of its inherent resistance to yellowing over time. But compared to polycarbonate, the relative brittleness of acrylic made its impact strength insufficient for demanding, vandal resistant applications. To meet this need, Sheffield Plastics developed MAKROLON SL polycarbonate sheet. It offers the best of both worlds—the impact protection of MAKROLON polycarbonate sheet and the UV resistance of acrylic. Utilizing advanced formulations combined with state-of-the-art extrusion technology, Sheffield Plastics has created a tough, consistent quality product that will exhibit superior performance for years to come.

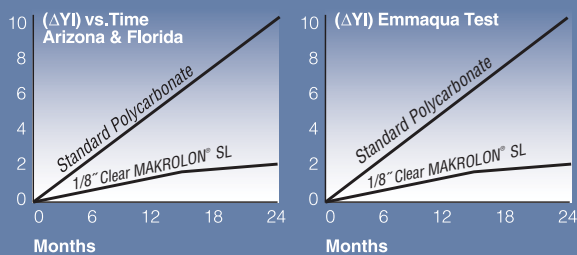

Performance Warranty

The performance of MAKROLON SL polycarbonate sheet has been well documented through years of laboratory and field testing. In side-by-side comparative testing under severe conditions, MAKROLON SL polycarbonate sheet consistently outperformed competitive materials utilizing older technology. Materials were also tested in forms and bends well beyond recommended guidelines, proving that the integrity of SL, as well as its UV resistance, will not change if the sheet is bent or cold-formed. So conclusive was this testing that Sheffield offers a limited warranty against excessive yellowing, loss of light transmission, and breakage.

Clearly The Right Choice

Superior Clarity, Superior Abrasion Resistance

MAKROLON® AR Abrasion Resistant Polycarbonate Sheet

MAKROLON AR polycarbonate sheet offers the dual protection you need to ensure long service life in demanding glazing applications. It offers the high impact strength of standard MAKROLON® GP polycarbonate sheet, coupled with enhanced weatherability and superior abrasion resistance. MAKROLON AR polycarbonate sheet features a unique clear hard coat finish that resists all types of abuse, from physical attack to chemicals and spray paint. General purpose polycarbonate can't be beat for impact strength. That's why it is so widely used in high traffic areas such as street level windows, bus shelters, and security glazing. Add an abrasion and UV resistant surface and the result is MAKROLON AR polycarbonate sheet, a polycarbonate glazing material that provides superior clarity* when subjected to repeated contact, cyclical cleaning, and even vandalism.

Standing Up to the Challenge

MAKROLON AR polycarbonate sheet is manufactured to the most demanding specifications in conformance to Sheffield's strict ISO 9001 certified Quality System requirements. Designed for superior performance and long life in high traffic, flat glazing applications, it is available in a wide range of gauges, tints, and sheet

sizes. MAKROLON AR polycarbonate sheet offers all the strength, durability, and clarity inherent to the MAKROLON brand with the added dimension of a leading technology hard coat for improved surface hardness, ultraviolet resistance, and chemical protection. MAKROLON AR polycarbonate sheet comes with a limited warranty against breakage, coating delamination, yellowing, hazing, and loss of light transmission.

Enhanced Weatherability

In addition to superior abrasion resistance, MAKROLON AR polycarbonate sheet offers unsurpassed weatherability—comparable to that of our MAKROLON® SL polycarbonate sheet product when subjected to prolonged periods of UV exposure.

Chemical Resistance

MAKROLON AR polycarbonate sheet features improved chemical resistance to a variety of cleaners, solvents, and other corrosive elements that can attack standard polycarbonate sheet. Care should be taken to install MAKROLON AR polycarbonate sheet in a sealed frame to protect uncoated saw-cut edges from chemical attack.

Cleaning and Maintenance

Under normal conditions, MAKROLON® AR polycarbonate sheet should be washed on a regular basis with a mild solution of soap and warm water, using a soft cloth or sponge. To prevent water spots, thoroughly dry MAKROLON polycarbonate sheet with a chamois or sponge. Do not use abrasive cleaners or sharp instruments such as razor blades or scrapers that may gouge the surface. For graffiti removal, organic solvents, such as butyl cellosolve, kerosene, VM & P naphtha or mineral spirits, work very well. Methanol, denatured ethanol, and isopropyl alcohol are also excellent cleansing agents. It is important to rinse off the surface thoroughly after cleaning.

High impact strength and nonstick, abrasion resistant surfaces are the key features of MAKROLON® AR polycarbonate sheet.

Clearly The Right Choice

MAKROLON® 15

Clearly the best choice
for glazing durability

MAKROLON® 15 Polycarbonate Sheet

The First Glazing Replacement Option
with a 15 Year Performance Warranty

A New Superior Polycarbonate Sheet Glazing Solution that Offers:

- ◆ Long-Term Weatherability
- ◆ Vastly Improved Glazing Durability
- ◆ Optical Clarity
- ◆ Vandalism Protection
- ◆ Substantially Superior Impact Resistance
- ◆ Significant Weight Reduction
- ◆ Enhanced Insulating Properties

**Substantial
Impact
Resistance**

**Vandalism
Protection**

**UV Resistant
and Energy
Efficient**

**Long-Term
Weatherability**

MAKROLON® 15 Polycarbonate Sheet offers long-term weatherability and is backed by a 15 year performance warranty. This significant performance enhancement is derived from MAKSHIELD™ innovative coating technology. MAKROLON 15 Polycarbonate Sheet achievement in performance offers significant longevity in the application life cycle costs.

MAKSHIELD hard-coat surface approaches the hardness of glass and addresses the issues previously associated with polycarbonate sheets*.

MAKSHIELD coating technology, combined with the impact strength of MAKROLON Polycarbonate Sheet, builds on Sheffield Plastics' long history of "none tougher" polycarbonate products.

MAKROLON 15 Polycarbonate Sheet is clearly the right choice for glazing where there is potential for glass breakage. These applications include schools, public buildings, transportation centers, and in areas where high traffic and vandalism is prevalent.

*Note: Based on ASTM Taber Abrasion Test D1044-99, 100 cycles.

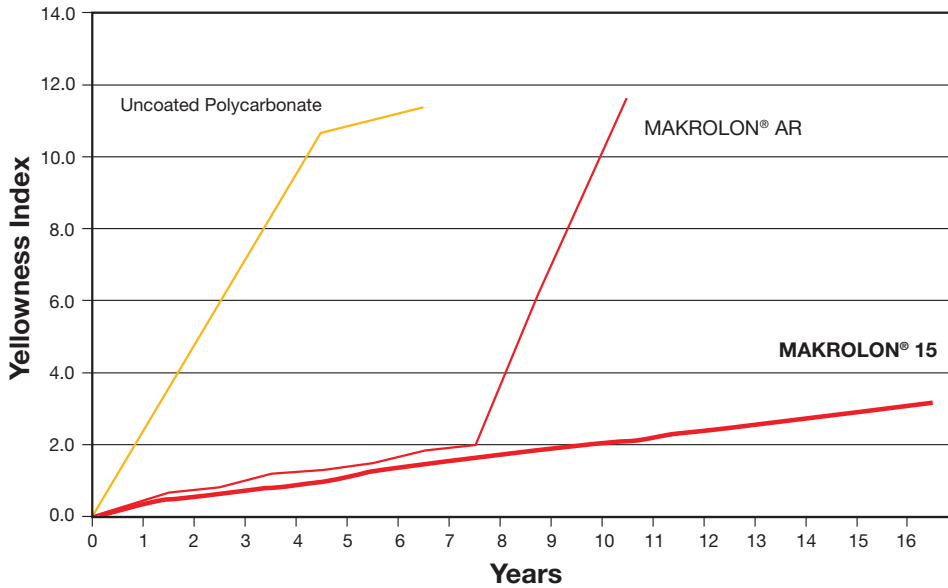

MAKROLON 15 Performance Warranty

Sheffield Plastics' 15 Year Warranty Guarantees MAKROLON 15 Polycarbonate Sheet for:

- ◆ Breakage Due to Manufacturing Defects
- ◆ Coating Failure
- ◆ Yellowing and Reduced Light Transmission Due to Hazing

MAKROLON® 15 Polycarbonate Sheet is Proven for Long-Term Performance

Weathering Behavior of MAKROLON® 15 in Vertical Orientation*

*Based upon Xenon WOM accelerated weathering for UV dose at mid-latitude location.

Technical Information

Physical Properties

High impact resistance, abrasion and UV protective surfaces, compliance with flammability ratings of major building codes, and high light transmittance characterize MAKROLON® polycarbonate sheet.

Code Ratings

MAKROLON polycarbonate sheet products satisfy major building code requirements including:

- CC-1* rating in construction applications (BOCA, ICBO, SBCCI and Dade County)
- Listed with Underwriter's Laboratories for the UL 94 flammability standard and UL 972 standard for Burglary Resisting Glazing Materials
- Approved for CPSC (16CFR 1201) Categories I & II
- Meets ANSI Z 97.1 1984 Safety Glazing Standards
- Certain gauges of MAKROLON® AR polycarbonate sheet meets H.P. White TP0500.02 Physical Attack Test Requirements for Level I containment glazing and meets a variety of specific requirements for protection against ballistic and/or physical attack.

Test results and other product specific information is available directly from Sheffield Plastics upon request.

Thermal Properties

MAKROLON polycarbonate sheet is an effective insulating material, particularly when compared to glass.

Sheet Combustibility

MAKROLON Polycarbonate sheet is among the least combustible of popular plastic glazing materials. However, it will ignite if exposed to an ignition source over 800°F.

MAKROLON® GP

General Purpose Glazing Polycarbonate Sheet

Standard MAKROLON GP polycarbonate sheet comes with a limited warranty against breakage. This limited warranty applies to glazing sheet installed and cleaned according to the manufacturer's recommendations. If failure occurs within the warranty period, the purchaser will receive a free replacement of MAKROLON polycarbonate sheet when the failed sheet, original sales receipt, and warranty are provided to Sheffield Plastics or the original distributor or dealer. Sheffield Plastics reserves the right to refund the original purchase price of the sheet in lieu of a replacement sheet. **Request warranty for full details.**

MAKROLON® SL

SunLife Polycarbonate Sheet

MAKROLON SL polycarbonate sheet comes with a limited warranty against breakage, loss of light transmission, and excessive yellowing. This warranty applies to glazing sheet installed and cleaned according to the manufacturer's recommendations. **Request warranty for full details.**

MAKROLON® AR

Abrasion Resistant Polycarbonate Sheet

MAKROLON AR polycarbonate sheet comes with a limited warranty against breakage, loss of light transmission, excessive yellowing, and coating failure. This limited warranty applies to glazing sheet installed and cleaned according to the manufacturer's recommendations. If failure does occur, as defined in the actual warranty, the purchaser will receive a free replacement of MAKROLON AR polycarbonate sheet. To receive the free replacement sheet, you must provide the failed sheet, original sales receipt, and warranty to Sheffield Plastics or the original distributor or dealer from whom the defective sheet was purchased. Sheffield Plastics reserves the right to refund the original purchase price of the sheet in lieu of a replacement sheet. **Request warranty for full details.**

Sheffield Plastics Inc. shall not be responsible for the use of this information relative to actual application. Users must make their own determination of its suitability for their specific use. No warranty is made for the fitness of any product, and nothing herein waives any of the Seller's conditions of sale.

Winter Heat Loss			
U-Value=BTU/hr../ft. ² /°F	1.05	1.01	.96

Installation Guidelines for MAKROLON® Polycarbonate Sheet

All grades of MAKROLON polycarbonate sheet can be cut, formed, and installed with ease when specific guidelines are followed. MAKROLON polycarbonate sheet may be installed using either wet or dry glazing systems, although use of PVC gasketing is not recommended.

MAKROLON polycarbonate sheet may also be used for double-glazing or overglazing applications for additional insulation and security. Maintain adequate separation between glazing panels to prevent contact during high humidity and/or high heat conditions.

Installation Procedures

1. Clean sash and prime if necessary. If glazing is being used as a replacement, make sure to remove all old sealant and projections. Rabbet should be free of burrs and deep enough to allow for natural expansion of the MAKROLON polycarbonate sheet glazing panel.
2. Carefully measure the sash opening and determine the appropriate edge engagement and expansion allowance from the table (opposite page). Cut MAKROLON polycarbonate sheet to the exact size required, making sure edges are smooth and free of any chips and notches.

3. Glaze MAKROLON polycarbonate sheet with the proper sealant. While smaller lites allow for the use of nonhardening oil-based and acrylic-latex caulks (up to 24" x 24"), the thermal and load movements in larger sheet sizes require high-performance, low modulus elastomers such as silicones. Please refer to the table below for recommended sealants, gaskets, and tapes.

For further information on recommended fabrication or installation techniques and framing methods, contact Sheffield Plastics Inc. Customer Service Department at 800-254-1707.

Expansion Allowances

As a general guideline, glazing systems should be designed to allow 1/16" per foot of length and width for expansion of polycarbonate in the sash.

Cold Bending

MAKROLON polycarbonate sheet may be cold bent on-site with the minimum radius as a function of the sheet thickness. As a guideline, the material can be radiused to 100 times the thickness. See the chart (opposite page) for recommended minimum radii.

Cutting

MAKROLON® polycarbonate sheet may be cut using most types of conventional power saws utilizing triple chip blade designs. Be sure to leave the protective masking intact when cutting to prevent marring of the surface.

Warning: Failure to use proper blades or cutting an unsecured sheet may cause injury and/or destruction of the material. MAKROLON polycarbonate sheet manuals with safety guidelines are available upon request.

Compatible Cleaners

Sheffield Plastics suggests the following cleaning agents for use with MAKROLON polycarbonate sheet products. All products should be used in accordance with the manufacturer's specifications.

Product Specifications

PART 1 GENERAL

1.1 SECTION INCLUDES

- A. Polycarbonate plastic glazing.
- B. Abrasion-resistant polycarbonate plastic glazing.
- C. Enhanced UV-resistant polycarbonate plastic glazing.
- D. Laminated polycarbonate plastic glazing for security applications.
- E. Laminated polycarbonate plastic glazing for bullet resisting security glazing.
- F. Multi-wall polycarbonate plastic glazing.
- G. Corrugated polycarbonate plastic glazing.

1.2 RELATED SECTIONS

- A. Section 07820–Metal Framed Skylights.
- B. Section 07900–Joint Sealers.
- C. Section 08520–Aluminum Windows.
- D. Section 08800–Glass and Glazing.
- E. Section 08920–Glazed Aluminum Curtain Wall Systems.

1.3 REFERENCES

- A. ANSI Z97.1–Safety Performance Specifications and Methods of Test for Safety Glazing Used in Buildings.
- B. ASTM D256–Standard Test Methods for Impact Resistance of Plastics and Electrical Insulating Materials.
- C. ASTM D638–Standard Test Method for Tensile Properties of Plastics.
- D. ASTM D790–Standard Test Methods for Flexural Properties of Unreinforced and Reinforced Plastics and Electrical Insulating Materials.
- E. ASTM D792–Standard Test Methods for Specific Gravity (Relative Density) and Density of Plastics by Displacement.
- F. ASTM D1929–Standard Test Method for Ignition.

1.4 SUBMITTALS

- A. Submit under provisions of Section 01300.
- B. Product Data: Submit manufacturer's printed product information that includes physical properties and recommended installation and glazing procedures, including edge engagement guidelines. Include data on material weight, wind load capacity, light transmission, shading coefficient, and thermal expansion.
- C. Verification Samples: Submit samples for each glazing type specified, not less than 12 inches square and framed on two adjacent sides to show glazing system.

1.5 DELIVERY, STORAGE, AND HANDLING

- A. Deliver polycarbonate sheets on enclosed pallets.
- B. Store in dry, well ventilated and covered areas at temperatures below 80°F.
- C. Handle polycarbonate sheets carefully to prevent damage; do not drop, slide or drag.

1.6 WARRANTY

- A. Comply with provisions of Section 01700.
- B. Provide manufacturer's written warranty covering breakage.
- C. Provide manufacturer's written warranty covering breakage, loss of light transmission, and yellowing.
- D. Provide manufacturer's written warranty covering breakage, abrasion resistance, coating failure, loss of light transmission, and yellowing.

PART 2 PRODUCTS

2.1 MANUFACTURER

- A. Provide products manufactured by Sheffield Plastics Inc., 119 Salisbury Road, Sheffield, MA 01257. Telephone: 800-254-1707.
- B. Substitutions will not be acceptable.

2.2 MATERIALS

- A. Polycarbonate Sheet: Comply with ANSI Z97.1 and with properties as follows:
 - 1. Specific gravity: 1.2 per ASTM D792.
 - 2. Tensile strength, yield: 9,000 psi per ASTM D638.
 - 3. Tensile strength, ultimate: 9,500 psi per ASTM D638.
 - 4. Tensile modulus: 340,000 psi per ASTM D 638.
 - 5. Flexural strength at 5% strain: 13,500 psi per ASTM D790.
 - 6. Flexural modulus: 345,000 psi per ASTM D790.
 - 7. Izod impact strength (0.125 inch notched): 12-16 ft./lb./in. per ASTM D256.
 - 8. Self ignition temperature: 1070°F per ASTM D1929.
 - 9. Flash ignition temperature: 870°F per ASTM D1929.
- B. General Purpose Type: Provide MAKROLON® GP plastic glazing sheet.
 - 1. Thickness: 0.060 inch nominal.
 - 2. Thickness: 0.093 inch nominal.
 - 3. Thickness: 0.118 inch nominal.
 - 4. Thickness: 0.177 inch nominal.
 - 5. Thickness: 0.236 inch nominal.
 - 6. Thickness: 0.375 inch nominal.
 - 7. Thickness: 0.500 inch nominal.
 - 8. Color: Clear A00.
 - 9. Color: Gray I30.
 - 10. Color: Dark Gray I35.
 - 11. Color: Bronze K09.
 - 12. Color: Custom color to match architect's sample.
- C. Enhanced UV Resistant Type: Provide MAKROLON® SL plastic glazing sheet.
 - 1. Thickness: 0.118 inch nominal.
 - 2. Thickness: 0.177 inch nominal.
 - 3. Thickness: 0.236 inch nominal.
 - 4. Thickness: 0.375 inch nominal.
 - 5. Thickness: 0.500 inch nominal.
 - 6. Color: Clear A00.
 - 7. Color: Gray I30.
 - 8. Color: Dark Gray I35.
 - 9. Color: Bronze K09.
 - 10. Color: Custom color to match architect's sample.

- D. Abrasion Resistant and UV Type: Provide MAKROLON® AR hard-coated plastic glazing sheet.
1. Thickness: 0.118 inch nominal.
 2. Thickness: 0.177 inch nominal.
 3. Thickness: 0.236 inch nominal.
 4. Thickness: 0.375 inch nominal.
 5. Thickness: 0.500 inch nominal.
 6. Color: Clear A00.
 7. Color: Gray I30.
 8. Color: Dark Gray I35.
 9. Color: Bronze K09.
 10. Color: Custom color to match architect's sample.
- E. Glazing Accessories: As recommended by manufacturer of plastic glazing sheet for wet or dry glazing installations.

PART 3 EXECUTION

3.1 EXAMINATION

- A. Inspect pallets upon delivery for evidence of damage.
- B. Inspect and verify that frame openings are correct size and conform to recommendations of the plastic glazing sheet manufacturer.

3.2 PREPARATION

- A. Clean frame contact surfaces with compatible solvent and wipe dry. Do not allow solvent to pool in glazing channels.
- B. Immediately prior to installation, expose glazing edges of plastic sheet by peeling back factory-applied protective masking to a dimension sufficient for edge engagement.

3.3 INSTALLATION

- A. Install plastic glazing in accordance with manufacturer's recommendations for edge engagement and expansion allowance.
- B. Employ only sealants and glazing accessories that have been approved by manufacturer of plastic glazing sheet.
- C. Remove protective masking immediately after all glazing operations are completed.

3.4 ADJUSTING AND CLEANING

If installed properly, plastic glazing should not require cleaning. If cleaning becomes necessary, comply with manufacturer's instructions, and use only cleaning agents and techniques that have been approved by the manufacturer.

3.5 PROTECTION

Comply with provisions of Section 01700 for protecting installed work. Affix polyethylene film or other covering approved by plastic glazing sheet manufacturer to framing members, as required to protect plastic glazing from other construction operations.

Support Documentation and Technical Assistance

Additional information regarding the Installation, Forming and Fabricating, UL Testing Procedures, and Product Certification Data of MAKROLON polycarbonate sheet products is available upon request. For more information, please write or call Sheffield Plastics Inc. Customer Service Department at 800-254-1707.
