

# Plastic Materials for Casino Barriers

## Allow more guests to play in the same area with attractive protective barriers

As a result of COVID-19, casinos are taking steps to welcome their guests back safely. Installing social distancing barriers at your facility can help keep your business open, while minimizing risk to your guests and employees.

Curbell Plastics supplies materials used to create social distancing and protection solutions at casinos, hotels, reception areas, and restaurants.

Acrylic, PETG, and polycarbonate plastic materials are transparent sheets used for clear protective panels, guards, and safety shields. Acrylic has the highest level of transparency. PETG is the most flexible, and polycarbonate has the greatest toughness and durability.

### Material selection, expert advice

At Curbell Plastics, we understand that you need clean, durable materials that look great.

If you're trying to choose a specific material, our plastics professionals will be happy to talk with you about your needs and suggest the best options for your casino. Our highly knowledgeable people use their expertise to help customers overcome challenges and take advantage of opportunities.

### BENEFITS OF SOCIAL DISTANCING BARRIERS:

- Create a protective barrier allowing players to safely sit side-by-side
- Leave fewer open spaces per table or slot machine
- Provide a protective barrier between table dealers and players
- Easy to fabricate and can be custom designed with or without logos and graphics
- Can be edge lit from sides for enhanced aesthetics
- Lightweight and transparent
- Easy to clean and disinfect
