

Vycom's Corrtec family of chemical and corrosion resistant materials offers many polymer options including PVC (Types I and II), CPVC, HDPE, PP, and CoPP formulations including the largest olefin sheet sizes in the world at up to 130" wide. These materials are designed to meet requirements in chemical handling, air processing, industrial tanks, pharmaceuticals, waste water management, and many more industries. The Corrtec family can handle everything from highly technical applications to your most basic needs.

CORZAN® CPVC

Top Applications:

- Plating Tanks
- Air Handling (Scrubbers, Ducts, and Fume Hoods)
- Wastewater Treatment
- Stripping Tanks
- Pipe Flanges and Spacers
- Electrical Cabinets

Key Material Benefits:

- Chemical Resistance
- Integrated Systems
- High Heat Stability
- Cost Effectiveness

Competitive Advantages (vs. other competitors' similar materials):

- Gauge Consistency
- Compatibility with other Corzan Components
- Extruded (up to 1") vs. Pressed or Laminated
- Product Breadth

Compliances:

- ASTM-D-1784-09
- ASTM-E-84
- UL 94 V-0
- RoHS Compliant

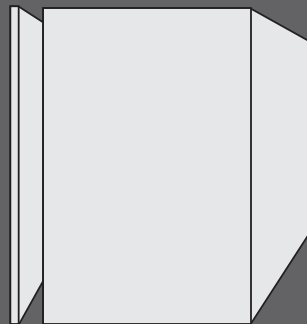

Colors/Finish/Thicknesses:

Colors:

Light Gray

Finish: Matte

Thicknesses: 1/8" - 3"

Standard sheet sizes in most formulations are 4'x8', 4'x10'. Custom sizes available upon request.
