

Plastic Materials for Grocery and Convenience Stores

Materials to help create attractive, safer shopping experiences for customers and employees

Curbell Plastics supplies materials used to create attractive and durable store fixtures, countertop shields, safety barriers, and wall coverings for grocery and convenience stores.

Acrylic, PETG, and polycarbonate sheet are plastics commonly used for clear protective panels and sneeze guards for cashiers and check-out lanes.

Store fixture manufacturers have started using **KYDEX® Thermoplastics** in place of high pressure laminates to create high-end tabletops, cash register counters, shelving, kiosks, and wall panels because of its durability and inherently antimicrobial properties. Durable, chemical and stain resistant, KYDEX® sheet is ideal for high-traffic, high touch areas.

AMGARD™ acrylic and polycarbonate transparent sheet is formulated with a silver ion antimicrobial agent that protects the sheet surface against the growth of microorganisms like bacteria, mold and mildew. AMGARD™ is also available in SR (scratch resistant) grade.

Material selection, expert advice

Our plastic material experts have experience working with contractors, store engineers, and procurement departments to source the materials they need. Contact Curbell Plastics today to discuss your requirements.

TYPICAL APPLICATIONS:

- Cashier shields
- Counter tops
- Displays
- Kiosks
- Shelves
- Sneeze guards
- Wall coverings

COMMON MATERIALS:

- Acrylic
- AMGARD™
- AMGARD™ SR
- Expanded PVC
- Fluted polypropylene
- HDPE
- King MediGrade® HDPE
- KYDEX® Thermoplastics
- PETG
- Polycarbonate

BENEFITS OF PLASTICS IN RETAIL FIXTURES:

- Durable and impact resistant
- Lightweight
- Easy to clean and disinfect
- Easy to fabricate
- Aesthetically pleasing and available in a wide variety of colors and textures
