Plastic materials to fulfill your needs

Curbell Plastics has materials to meet the demanding requirements of the medical equipment industry. We recognize that medical device manufacturers require durable FDA, USP Class VI, and ISO 10993-5 compliant materials that stand up to repeated sterilization. Our ISO 9001:2008 facilities meet the most rigorous quality management documentation requirements.

Plastics are used for a range of medical applications including housings, flexible tubing, implant sizing trials and surgical instrument handles and trays.

Material selection, expert advice

"Curbell worked with our designers to replace a painted metal housing with a formed plastic one. This saved cost and weight and improved the aesthetics of our product".
