

Product Information

Delrin® Sheet in Standard Colors

Enginger Penn Fibre Inc. has established a line of standard Delrin® colored sheets in 2' X 4' sheets at .031", .062" and .125" thick in an array of vibrant colors. The following colored Delrin® sheets, in addition to our Natural and Black, are now standard stock, requiring no minimum production size or additional lead time.

Blue	Green	Red
Flourescent Green	Orange	Yellow
Flourescent Pink	Purple	

Enginger's Delrin® colored sheets are a homopolymer Acetal manufactured using DuPont Delrin® 150 Resin. It is a crystalline plastic which offers an excellent balance of properties to bridge the gap between metals and plastics. It possesses high tensile and flexural properties, along with creep resistance and toughness, while exhibiting low moisture absorption, and fatigue endurance.

Where does Colored Delrin Sheet Fit?

- Color coded shims (indicating thickness)
- Color coded parts (washers & other shapes)
- Doctor Blades for Rotograuve printing
- Containment Blades for printing
- Various industrial and commercial panels
- Point of purchase displays
- Stiffeners for arts & crafts
- Musical Instruments (pics, guitar frets, bridge)
