

T-Mobile Park Drink Rails and Table Tops Made with King StarBoard®

T-Mobile Park is a state-of-the-art retractable roof ballpark that opened in 1999 and has become one of the premier facilities in Major League Baseball (MLB). The 47,929-seat stadium is home to the Seattle Mariners.

The Drink Rails were designed so that guests face the same direction and experience a shared event. The drink rails are available in various lengths with 1, 2, or 3-cup holders. The Cup Holders keep the beer colder, so the last sip is colder and more refreshing than the first. The drink rails are adjustable to bar height for bar stools and standing-only, or ADA height for lower seating and wheelchairs. Features include inductive phone chargers, purse hooks, foot rails, and power that can be controlled at the drink rail or hard-wired into the venue's electricity.

The Table Tops were designed for a plush "cold beer" experience in VIP seating areas. The comfy, oversized recliners are paired with the table tops with 1 or 2-cup holders and are height-adjustable. Some of the features include inductive phone chargers and a sheltered cubby for guests' belongings.

Designed exclusively for Molson Coors, the Drink Rails and Table Tops are made with Dolphin Gray, 3/4" gauge of King StarBoard®.

T-Mobile Park Drink Rails and Table Tops Made with King StarBoard®

Initial Situation

In 2020, T-Mobile Park specified Drink Rails and Table Tops for the Coors Light® Silver Seats VIP seating area. Since the Drink Rails and Table Tops are located and used in high-traffic areas, exposed to UV, humidity, and water, they require durable, long-lasting building materials to withstand the harshest outdoor conditions.

Task

T-Mobile Park specified Drink Rails and Table Tops for the Coors Light® Silver Seats VIP seating area made with King StarBoard®.

Solution

King StarBoard® is the original marine-grade high-density polyethylene sheet and the leading brand in the marine industry. The King name is synonymous with quality to those who know plastics. It is the product of a proprietary process called K-Stran™, the most advanced manufacturing process for superior flatness and consistency. King StarBoard® has a matte finish. It is environmentally stabilized to withstand the harshest outdoor conditions. King StarBoard® will not rust, delaminate or rot when exposed to UV, humidity or water. The polymer sheet never needs painting or refinishing, works like wood, and is easy to fabricate with common woodworking tools and techniques. King StarBoard® can be upgraded with King FlameShield for ASTM E-84 Class A Flame Compliance and CAN/ULC-S102 for Canadian Compliance.

King StarBoard®

Properties

- Environmentally Stabilized
- Waterproof
- Will Not Rust, Delaminate, or Rot
- Easy to Fabricate
- High-Impact Strength
- Abrasion and Stress Crack Resistant
- Never Needs Painting or Refinishing
- Maintenance Free
- Made from FDA Approved Materials
- Custom Sheet Sizes, Gauges and Colors Available
