

OPTIX FLEXILUME SPECIALTY FILM

DESCRIPTION

OPTIX Flexilume film is best used as an overlay film for lenses or louvers or as contour inserts with perforated metals, profiles or reflecting surfaces.

This thin, flexible film (.020") is easily cut or sheared. Available in clear or white impact acrylic, OPTIX Flexilume features a matte/smooth finish, excellent uniformity, and offers 93% transmission for clear, 62% transmission for white.

Standard sheet available as well as custom sizes.

Material

Up-to-date and detailed material specifications can be found in the Resources section of our website at www.plaskolite.com
