# TECAPEEK® natural polyetheretherketone - Stock Shapes (rods, plates, tubes)

### Chemical Designation

PEEK (Polyetheretherketone)

## *Colour* beige opaque

*Density* 1.31 g/cm<sup>3</sup>

#### Main features

- → made exclusively from Victrex® resin
- → excellent chemical resistance
   → high thermal resistance
- night thermal resistance
- → good heat deflection temperature
- → good machinability
- very good slide and wear properties
   hydrolysis and superheated steam resistant

### **Target Industries**

- → aircraft and aerospace technology
- → food technology
- → oil and gas industry
- chemical plant engineering
- → semiconductor technology
- → food engineering
- → medical technology
- → automotive industry
- → process engineering
- → mechanical engineering

Mechanical properties	condition	value		test method		comment		
Modulus of elasticity (tensile test)	1% Sec, 73 °F	650,000	psi	ASTMD 638		<ul> <li>(1) Data obtained from public source</li> <li>(2) Injection molded</li> </ul>

→ Resin specification: ASTM D4000-11 PEEK; ML-P-46183 Ty. I Shapes specification: ASTM D6262-12 S-PAEK0111

→ TECAPEEK products are based on Victrex® PEEK polymer.

This information reflects the current state of our knowledge and is intended only to assist and advise. It is given without obligation or liability. It does not assure or guarantee chemical resistance, quality of products or their suitability in any legally binding way. Values are not minimum or maximum values, but guidelines that can be used for comparative purposes in material selection. They are within the normal range of product properties and do not represent guaranteed property values. Testing under individual application circumstances is always recommended. Data is obtained from extruded shapes material unless otherwise noted. References to FDA complex to the resins from which the products were made unless otherwise noted.
