PLASKOLITE

QUALITY COMMITMENT

PLASKOLITE is a leading manufacturer of extruded acrylic sheet, continuous cast acrylic sheet, polycarbonate sheet, PETG sheet, multiwall sheet, acrylic resin, and plastic mirror sheet. Since 1950, we have built a long-standing reputation for providing high quality products and responsive customer service.

PLASKOLITE'S commitment to quality extends over every aspect of its business. With a manufacturing footprint of over 1 million square feet and growing, PLASKOLITE delivers the highest quality sheet and resin to customers worldwide, under rigorous ISO 9001 quality standards.

To better serve our customers, sheets can be ordered in customized "Run-to-Size" dimensions and special patterns and thicknesses. Customer Service Representatives use automated order and shipping tracking systems to provide customers with up-to-the-minute information on their orders.

From manufacturing through customized product offerings, packing, shipping and order tracking, PLASKOLITE is committed to delivering the highest quality products and service to its customers.

Acrylic Sheet Properties

OPTIX EXTRUDED ACRYLIC SHEET

OPTIX extruded acrylic is a lightweight, crystal clear, weather-resistant sheet ideal for many fabrication or glazing applications. The exceptional clarity and weatherability of OPTIX acrylic sheet makes it the perfect choice for applications with high optical and light transmitting requirements. It is impact resistant,

and does not shatter into sharp-edged pieces, which makes it a good alternative to glass. OPTIX is available in a wide range of gauges, textures, colors and sizes.

APPLICATIONS INCLUDE:

Point-of-purchase displays, lighting, signage, picture framing, glazing, transportation

Typical Properties

Property	Test Method	Units	Values
PHYSICAL			
Specific Gravity / Relative Density	ASTM D792	-	1.19
Optical Refractive Index	ASTM D542	-	1.49
Light Transmission - Total	ASTM D1003	%	92
Light Transmission - Haze	ASTM D1003	%	<2
Sound Transmission	ASTM E90 / E413	dB	27
Water Absorption	ASTM D570	%	0.4
Mold Shrinkage	ASTM D955	mils/in	2-6
MECHANICAL			
Tensile Strength	ASTM D638	psi	11,030
Tensile Elongation - Max.	ASTM D638	psi	5.8
Tensile Modulus of Elasticity	ASTM D638	psi	490,000
Flexural Strength	ASTM D790	psi	17,000
Izod Impact Strength - Notched	ASTM D256	ft-lb./in	0.4
Tensile Impact Strength	ASTM D1822	ft-lb./in ²	20
Abrasive Resistance - Change in Haze			
10 cycles	ASTM D1044	Haze %	11.2
50 cycles	ASTM D1044	Haze %	24
200 cycles	ASTM D1044	Haze %	24.9
Rockwell Hardness	ASTM D785	-	M-95
THERMAL			
Maximum Recommended			
Continuous Service Temperature	-	°F	170-190
Softening Temperature	ASTM D1525	°F	210-220
Deflection Temperature @ 264 psi (1.8 MPa)	ASTM D648	°F	203
Deflection Temperature @ 66 psi (0.45 MPa)	ASTM D648	°F	207
Coefficient of Linear Thermal Expansion	ASTM D696	in/in/°F	3.0 x 10 ⁻⁵
Thermal Conductivity	ASTM C177	Btu-ft/ft ² /hr/°F	0.075
Flammability (Burning Rate)	ASTM D635	in/min	1.0
Flammability	UL 94	-	HB
Smoke Density Rating	ASTM D2843	%	3.4
Self-Ignition Temperature	ASTM D1929	°F	833
Flame Spread Index	ASTM E84	-	115
Smoke Developed Index	ASTM E84	-	550

General Purpose

GENERAL-PURPOSE ACRYLIC SHEET

OPTIX general-purpose acrylic sheets have the superior optical properties necessary for applications requiring high clarity, such as high-end lighting systems, and picture framing. They are easy to fabricate and form, with exceptional UV stability, for many interior and exterior applications.

Our OPTIX general-purpose acrylic sheets include transparent, translucent, patterned and frosted appearance, and are available in a broad range of gauges and sheet sizes.

APPLICATIONS INCLUDE:

Signage, lighting fixtures, retail display

Please refer to pages 6 and 7 for product stock numbers and packaging information.

Sheet Thickness

OPTIX general-purpose acrylic sheet is produced within industry standards of $\pm 10\%$ on thickness. Minimum thicknesses are available. Call for quotation and production minimums.

Sheet Tolerances (on line)

OPTIX general-purpose acrylic sheet is produced to tolerances of $\pm 1/16"$ length and width on sizes 42" and smaller. Sheet sizes greater than 42" up to 60" are produced to length and width tolerances of $\pm 3/32"$. All sheet sizes greater than 60" produced to length and width tolerances of $\pm 1/8"$ (-0, $+1/4$ on 48" x 96" stock sizes and above).

Sheet Squareness (on line)

OPTIX general-purpose acrylic sheet is produced to squareness tolerances of $\pm 1/8"$ on sizes 42" and smaller. Sheet sizes greater than 42" to 60" squareness is $\pm 3/16"$ and sheet sizes greater than 60" squareness is $\pm 1/4"$.

Sheet Edges

Edges are supplied slit, hot sheared and saw cut.

Sheet Masking

Most general-purpose acrylic is stocked with a 2 mil Co-Ex masking, on two sides. A variety of sheet masking options and configurations are available including papermasking, TG paper replacement film, and 3 mil formable film.

Run-to-Size Sheet

Run-to-Size Solutions offered by PLASKOLITE delivers ultimate flexibility by allowing the purchase of OPTIX general-purpose and other popular substrates made to individual specifications.

Custom sizes, thicknesses, colors, masking and packaging options available. See page 10 for more details on Run-to-Size from PLASKOLITE.

PLASKOLITE'S acrylic sheets are covered under the following:

- » International Code Council Evaluation Service (ICC-ES) listings (incorporates former ICBO, SBCCI, BOCA and NES certifications) as Plastics
- » ANSI Z97.1 Safety Glazing Requirements
- » ANSI Z26.1 Motor Vehicle Safety Glazing Standard
- » Underwriters Laboratories (UL) listings UL 94HB
- » Miami-Dade County Product Control Notice of Acceptance - Clear Plastics
- » 10-year limited warranty on all clear acrylic sheets
- » ASTM D-4802 - B-1 Plastics

RUN-TO-SIZE AVAILABLE

Run-To-Size Program

OPTIX RUN-TO-SIZE PROGRAM

PLASKOLITE offers the flexibility of running OPTIX general-purpose extruded acrylic, SG sheet products, impact-modified acrylic sheet (DURAPLEX, SG05, SG10) and FABBAC acrylic mirror sheet, to individual specifications:

- » Allows for purchase of exact sizes, in exact quantities
- » Eliminates scrap, unused inventory and year end drops
- » Saves time, space and prolongs life of fabrication equipment

Low minimum order requirements

Quick turnaround time—the shortest in the industry

Wide range of sizes up to 105"

Thickness range from 0.040" to 1.0"

Thickness	Width	Length
0.040" *	5"	14"
0.060" **	5"	14"
0.080" **	5"	14"
0.100" **	5"	14"
0.125" **	5"	14"
0.177"	28"	20"
0.187"	28"	20"
0.220"	28"	20"
0.236"	28"	20"
0.250"	28"	20"
0.375"	28"	20"
0.500"	30"	30"
0.750" ***	30"	30"
1.00" ***	30"	30"

Non-Stock Material:

- » Special tolerances, film coverages, thicknesses and sizes available
- » Saw cut edges available
- » 3,000 lb. minimum order required for a custom thickness of clear acrylic
- » 3,000 lb. minimum required for color production run
- » 5,000 lb. minimum required for 0.500" color production run
- » 10,000 lb. minimum required for color production run over 0.500"

On line production minimum thickness, length and width requirements

- » Saw cut and slitter/hot knife edges available.
- » Sheet edges may vary, please specify preferred edge cut at the time of order.

Run-to-Size sheet minimums

1,000 LB. minimum per size

* 20,000 lb. minimum required for production run

** 10,000 lb. minimum required for part lengths less than 14"

*** 10,000 lb. minimum required per size change

Colors, DURAPLEX and Patterns

- » 3,000 lb. minimum required for colors
- » 20,000 lb. minimum for patterns
- » 3,000 lb. minimum required for 0.500" colors
- » 1,000 lb. minimum for required per size change

**RUN-to-SIZE IS ALSO AVAILABLE

EXTRUDED ACRYLIC

DURAPLEX® Impact-Modified

DURAPLEX IMPACT-MODIFIED ACRYLIC SHEET

DURAPLEX impact-modified acrylic sheets (also known as Sign Grade acrylic) have higher impact strengths than general-purpose acrylic sheet. They have the superior optical properties necessary for high quality sign and lighting systems. These materials are easy to fabricate and form, with exceptional UV stability, for many interior and exterior applications.

DURAPLEX is available as a custom blend for impact strength and in a wide range of gauges, sheet sizes, colors and patterns as well as sheet or roll stock.

APPLICATIONS INCLUDE:

Displays, skylights, signage, fabrication, windows, doors and any indoor/outdoor application where durability is needed

RUN-TO-SIZE AVAILABLE

EXTRUDED ACRYLIC

SIGN GRADE (SG) ROLL STOCK AND FLAT ACRYLIC SHEET

PLASKOLITE OFFERS THREE GRADES OF ACRYLIC:

SG - OPTIX Acrylic

SG05 - DURAPLEX Medium Impact Modified Acrylic

SG10 - DURAPLEX High Impact Modified Acrylic

Roll Stock Advantages:

- » Unlimited lengths, no seams in finished products
- » Superior forming characteristics - no predrying, detailed vacuum definition, fast cycle times
- » Better, total sheet usage - less scrap due to custom size roll widths and lengths

Custom roll widths, lengths, thicknesses and colors available. Call for quotation and delivery information.

Roll stock has clear 2 mil film with SG strip tape.

Flat sheet is supplied with a 2 mil polyfilm unless otherwise noted. Papermasking or 3 mil formable film also offered.

DIGITAL ACRYLIC SHEET

OPTIX DA (Digital Acrylic) sheet is specifically designed to provide optimal adhesion of UV curing inks without adhesion promoters. OPTIX DA delivers all the benefits of continuously processed acrylic sheet in a specially formulated product for printing. It can be used in interior and exterior (outward facing non-printable side) applications.

OPTIX DA provides superior strength and is available in a variety of gauges 0.060" - 0.236" with standard and run-to-size options. Call Customer Service for details.

APPLICATIONS INCLUDE:

Signage, graphics and dry-erase boards

DA

Item #	Thickness	Description	Quantity

OPTIX E-DA - ERASABLE DIGITAL ACRYLIC SHEET

OPTIX E-DA (Erasable Digital Acrylic) sheet is specifically designed to provide optimal adhesion of UV curing inks without adhesion promoters. OPTIX E-DA delivers all the benefits of continuously processed acrylic sheet in a specially formulated product for printing, but with the added benefit of an abrasion- and chemical-resistant coating on one side. This product is perfect for contemporary markerboard designs and a variety of interior anti-graffiti applications.

OPTIX E-DA provides superior strength and is available in a variety of gauges 0.118" - 0.220" with standard and run-to-size options. Call Customer Service for details.

APPLICATIONS INCLUDE:

Signage, graphics and dry-erase boards

RUN-TO-SIZE AVAILABLE

LIGHT DIFFUSING ACRYLIC SHEET

OPTIX LD light diffusing acrylic sheet provides superior diffusion properties that allow for greater sign design flexibility and slim profile channel (CAN) letters. Visible hot spots and luminance fluctuations are eliminated while maintaining optimum light transmission. Available in a variety of popular sign colors, SG05 impact-modified, frost and non-glare finishes. Custom color matching available. Standard offering is papermask 2-sides unless noted in the chart below.

EXTRUDED ACRYLIC

AMGARD[®] SAFETY SHIELDS

Antimicrobial

AMGARD ACRYLIC SHEET

AMGARD clear acrylic sheet is formulated with a silver ion antimicrobial technology that protects the sheet surface from microorganism growth and remains active for the entire life of the product. When used as protective barriers, AMGARD acrylic sheet provides a clear, solid partition between individuals. It is easy to fabricate and form for a wide range of interior applications.

- » Independent laboratory tested
- » Inhibits microbe surface degradation
- » Half the weight of glass
- » Does not shatter into sharp-edged pieces like glass
- » Easy to fabricate & clean

*AMGARD is formulated with silver ion antimicrobial technology to protect the sheet's surface. It is not designed to prevent the transmission of any disease or infectious agent.

AMGARD SR ACRYLIC SHEET

AMGARD SR scratch-resistant acrylic sheet is formulated with silver ion antimicrobial technology that protects the sheet surface from microorganism growth and remains active for the entire life of the product. The proprietary coating system provides enhanced abrasion resistance to acrylic's inherent excellent clarity. The antimicrobial coating also adds exceptional resistance to common disinfecting cleaning chemicals. The result is a high optical quality and tough antimicrobial sheet that can stand up to today's demanding safety barrier environments.

Additional benefits of AMGARD SR to those of AMGARD:

- » Abrasion resistant
- » Chemical resistant
- » High clarity

OPTIX[®] AMGARD and AMGARD SR

Packaging

- » Stock case packaging

APPLICATIONS INCLUDE:

Protective barriers, office partitions, safety enclosures, equipment housings

APPLICATIONS INCLUDE:

Protective barriers, office partitions, safety enclosures, interior windows and glazing

FIRST SURFACE (2-Sided) MIRROR SHEET

FABBACK "First Surface" (two-sided mirror) consists of an opaque film of aluminum, protected by a tough clear coating. Light incident from either direction is reflected. "First Surface" is often used in retail display and special lighting. The dual surface reflection property is ideal for those applications where the back side of the mirror will remain exposed, or where a reflection in both directions is desired. It is available in acrylic or polycarbonate and with a color option.

Standard thicknesses 0.118" and 0.236"

MARINE GRADE ACRYLIC MIRROR SHEET

Marine Grade is a high quality, premium grade of FABBACK acrylic mirror sheet. The sheets are double inspected throughout the manufacturing process to ensure maximum quality for use in boat/yacht interiors.

Available in 0.118" and 0.236" thicknesses in a 48" x 96" sheet size with a protective papermasking on 2 sides. Scratch-resistant coating, custom sizes, thickness and alternative protective masking options available.

FABBACK SEE-THRU MIRROR SHEET

"See-thru" or "Two-Way" mirror has a semi-transparent aluminum film deposited on the substrate that allows a percentage of incident light to pass through, while reflecting the remainder. From the illuminated side, it's a mirror; from the darkened side it's transparent. This material is used in monitoring/surveillance, infinity lighting, multiple imaging and advertising applications.

Available in 0.118" and 0.236" thicknesses in a 48" x 96" sheet size. See-Thru mirror is available in acrylic or polycarbonate with custom color, size and thickness options available.

LED DIFFUSION SHEET

- » Matte textured surface on 2 sides
- » Light transmission consistent throughout thickness range
- » Wide range of standard grades to meet various design specifications
- » Optimized for high light transmission while maintaining excellent diffusion
- » Superior hiding power to eliminate any LED "hot-spots"
- » All grades listed are available in polymer format for extrusion purposes
- » Custom gauges and sizes available

Product	Color	Light Transmission*	Diffusion	Half Angle*	Available Thickness
OPTIX LED PXT-Clear	Clear	92%	Minimal	3	0.060", 0.080", 0.118"

THERMOPLASTIC

VIVAK® PETG Thermoplastic

PETG THERMOPLASTIC SHEET

VIVAK sheet is a transparent thermoplastic sheet. Among its advantages, this sheet is made from PETG resin that is NSF listed and conforms to FDA food contact regulations. VIVAK sheet offers excellent impact strength and is a cost effective thermoplastic for the Point of Purchase (POP) industry. It offers deep draws and precise molded-in details without sacrificing structural integrity. VIVAK sheet can be bonded or fastened with adhesives, ultrasonic welding or rivets. In addition, VIVAK sheet is easily decorated by painting, silk screening, or hot stamping. VIVAK sheet is well suited for a variety of POP displays and interior signage.

APPLICATIONS INCLUDE:

Greeting card displays, revolving merchandise racks, indoor signs, POP displays, menu boards, photo frames, and slat wall inventory displays

THERMOPLASTIC

A·B·S Thermoplastic

ABS THERMOPLASTIC SHEET

ABS Thermoplastic sheet is the ideal combination of durability, formability and strength. Utility grade ABS (Acrylonitrile Butadiene Styrene) sheet is extruded with the highest quality regrind and 100% virgin cap. ABS is stocked with one side Haircell and the other smooth, with gauges available from 0.060" - 0.236". It has outstanding formability, high impact strength, and durability.

Custom color matching and sizes are available.

- » Outstanding molding and fabrication
- » Rigid and creep resistant
- » Run to size - 3000 pound minimum

APPLICATIONS INCLUDE:

Automotive, dunnage, containers

PLASKOLITE OFFERS THE FLEXIBILITY OF RUNNING CUSTOM SHEET IN THE SIZES YOU AND YOUR CUSTOMERS NEED

Run-to-Size sheet solutions from PLASKOLITE are the right way to think about your next order. Think smaller sheet sizes to lower cost by buying in the length and width you need. Think greener by allowing PLASKOLITE to run less material and create less scrap for you. Run-to-Size also means a more reliable and predictable price with 2-week lead times.

TUFFAK GP & TUFFAK SL Clear - 1000 LB minimum

TUFFAK GP & TUFFAK SL Standard Colors* - 3000 LB minimum

- » *GP Standard Colors - I30- Gray, I35- Dark Gray, K09- Bronze, H35- Green , L10 - Black
- » *SL Standard Colors - B54, B59 - White
- » One time custom colors - 20,000 LB minimum

Run-to-Size Parts meet:

- » Approved Material List
- » Gauge is 0.060" - 0.236"
- » Within 6" of Standard Web Width
- » Standard Web Widths are 36", 48", 60", 72", and 96"

GENERAL PURPOSE POLYCARBONATE SHEET

TUFFAK GP sheet is a polished surface, UV stabilized, transparent polycarbonate product. It features outstanding impact strength, superior dimensional stability, high temperature resistance, and high clarity. This lightweight thermoformable sheet is also easy to fabricate and decorate. TUFFAK GP sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Industrial glazing, machine guards, structural parts, thermoformed and fabricated components

Packaging

- » Weight per Case: Varies per gauge
- » Weight per Pallet: 2,000 lbs.
- » Weight per Half Pallet: 1,000 lbs.

Masking

Standard Masking Configurations

Gauges: 0.030" - 0.236", Makro Mask, Two (2) Sides

0.375" - 0.500", Paper Masking, Two (2) Sides

Additional masking available - Price Per Side

TUFFAK®-GP-V

Flame Retardant

GENERAL PURPOSE / FLAME RETARDANT POLYCARBONATE SHEET

TUFFAK GP-V sheet is a polished surface, UV stabilized, transparent polycarbonate product. GP-V is a flame retardant grade with a UL 94 V-2 rating at 0.060" and greater, then improves to V-0 rating at 0.220" and greater. Other properties include outstanding impact strength, superior dimensional stability, high temperature resistance, and high clarity. This lightweight thermoformable sheet is also easy to fabricate and decorate. TUFFAK GP-V sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Industrial parts and components of electrical devices requiring UL 94 V-rated performance, thermoformed and fabricated parts

Packaging

» Weight per Case: Varies per gauge

TUFFAK®-GP

Textured

MATTE TEXTURED POLYCARBONATE SHEET

TUFFAK GP Matte sheet is a translucent, UV stabilized, polycarbonate product with a matte textured surface on one side. This unique matte texture obscures vision and reduces glare. The product features outstanding impact strength, superior dimensional stability, and high temperature resistance. TUFFAK GP Matte sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Industrial glazing, privacy glazing, thermoformed and fabricated translucent components, signs, displays, lighting covers

PEBBLE TEXTURED POLYCARBONATE SHEET

TUFFAK GP Pebble sheet is a translucent, UV stabilized, polycarbonate product with a pebble texture on one side. This unique pebble texture is useful in obscuring vision, reducing glare, and helps to hide the appearance of surface scratches. The textured product features outstanding impact strength, superior dimensional stability, high temperature resistance, and flame resistance. TUFFAK GP Pebble sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Privacy glazing, decorative glazing, awnings, skylights, shower doors, factory over-glazing, lighting covers

TUFFAK®-GP-V

Textured / Flame Resistant

MATTE TEXTURED POLYCARBONATE SHEET

TUFFAK GP-V Matte sheet is a translucent, UV stabilized, polycarbonate product with a matte textured surface on one side. This unique matte texture obscures vision and reduces glare. The product features outstanding impact strength, superior dimensional stability, high temperature resistance and meets a vertical burn resistance per UL 94 @ 0.213" and thicker. TUFFAK GP-V Matte sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Industrial glazing, privacy glazing, thermoformed and fabricated translucent components, signs, displays, lighting covers

PEBBLE TEXTURED POLYCARBONATE SHEET

TUFFAK GP-V Pebble sheet is a translucent, UV stabilized, polycarbonate product with a pebble texture on one side. This unique pebble texture is useful in obscuring vision, reducing glare, and helps to hide the appearance of surface scratches. The textured product features outstanding impact strength, superior dimensional stability, high temperature resistance and meets a vertical burn resistance per UL 94 @ 0.213" and thicker. TUFFAK GP-V Pebble sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Privacy glazing, decorative glazing, awnings, skylights, shower doors, factory over-glazing, lighting covers

Packaging

- » Weight per Case: Varies per gauge
- » Weight per Pallet: 2,000 lbs.
- » Weight per Half Pallet: 1,000 lbs.

PRISMATIC TEXTURED POLYCARBONATE SHEET

TUFFAK GP Prismatic and GP-V Prismatic sheet are translucent, UV stabilized, polycarbonate products with a prismatic texture on one side. This prismatic pattern has been optimized for light diffusion and light transmission, making it an excellent choice for most conventional lighting applications. The textured product features outstanding impact strength, high temperature resistance, superior dimensional stability, and is easy to fabricate. The GP Prismatic meets a vertical burn resistance per UL 94 @ 0.213" and thicker. TUFFAK GP Prismatic sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Lighting lenses and covers

FDA FOOD CONTACT COMPLIANT POLYCARBONATE SHEET

TUFFAK FD sheet is a non-UV stabilized transparent polycarbonate product which complies with FDA regulation 21 CFR § 177.1580 requirements for food contact and is produced with NSF certified resin. Ideally suited for demanding applications in food processing environments, as well as medical applications, this lightweight thermoformable sheet is also easy to fabricate and decorate. TUFFAK FD sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Food processing equipment and guards, bulk food bins, candy molds, sneeze guards, single use autoclave packaging, hospital trays, bassinets, incubators, medical device storage containers

Packaging

- » Weight per Case: Varies per gauge
- » Weight per Pallet: 2,000 lbs.

UV RESISTANT SIGN GRADE POLYCARBONATE

TUFFAK SL Sign Grade sheet is a polycarbonate product with an advanced UV resistance technology that promotes long lasting outdoor weathering performance. It features outstanding impact strength, excellent dimensional stability, high temperature resistance, and high clarity. This lightweight thermoformable sheet is also easy to fabricate and decorate. TUFFAK SL is offered in clear, a wide range of standard sign colors, or can be custom matched to any color. The product, available in either sheet or reels, has a proven track record of outstanding performance in extreme environments and meets the UL 879 standard for electric sign components. A ten (10) year limited product warranty is available for both clear and colors for breakage resistance. Clear sheet is also covered for weathering resistance. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Flat and formed sign faces and channel letters

Packaging

SKYLIGHT POLYCARBONATE SHEET

TUFFAK SK sheet is a non-UV enhanced sheet with a prismatic texture. It is designed for use as an interior lens of a skylight system, protected from direct sunlight exposure by a UV-resistant outer cover such as TUFFAK SK1* sheet. The prismatic texture helps to diffuse the sun's light throughout the interior space. TUFFAK SK can be drape or thermoformed for use in contoured applications such as domed skylights. In either flat or contoured geometries, it has significantly higher impact resistance compared to acrylic, impact modified acrylic, or glass. TUFFAK SK sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Interior light for skylights and barrel vaults

LIGHT DIFFUSING POLYCARBONATE SHEET

TUFFAK LD sheet is a polycarbonate product designed with an advanced light diffusion technology that provides excellent light uniformity without sacrificing light transmission. The proprietary diffuser technology eliminates visible hot spots from pinpoint LED lights in typical flat and formed sign applications. LD is available in a range of standard sign colors and can be custom matched to any color. TUFFAK LD is easy to form, fabricate, and decorate, and has excellent impact strength and dimensional stability. The product's UV resistance technology assures long lasting outdoor weathering performance. TUFFAK LD is offered with a ten (10) year limited product warranty against breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Flat and formed sign faces, channel letters, and lighting fixture covers

TUFFAK®-uv

UV Resistant

EXTENDED UV RESISTANT POLYCARBONATE

TUFFAK UV sheet is a transparent polycarbonate product with an advanced UV resistant technology that assures long lasting outdoor weathering performance in flat and curved glazing applications. It has higher impact resistance than acrylic and glass, and it can be cold-formed during installation. TUFFAK UV is produced with high optical quality and minimal distortion in clear, a range of standard architectural tints, or can be custom matched to any color. TUFFAK UV has a ten (10) year Limited Product Warranty against breakage, yellowing, and loss of light transmission. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Awnings, entryway canopies, skylights, barrel vaults, glazed archways, covered pedestrian walkways, and sloped, vertical, and curved glazing

TUFFAK[®]-AR

Abrasion Resistant

ABRASION-RESISTANT POLYCARBONATE SHEET

TUFFAK AR polycarbonate sheet is a one or both sides hard-coated polycarbonate product that adds higher abrasion resistance and surface hardness to polycarbonate's inherent performance benefits of impact strength and clarity. The proprietary hard-coat also provides chemical resistance and long lasting outdoor weathering performance. This product is available in clear, a range of standard tints, or can be custom matched to any color. TUFFAK AR polycarbonate sheet has a seven (7) year Limited Product Warranty against breakage, yellowing, and hazing. The terms of the warranty are available on request.

APPLICATIONS INCLUDE:

Flat architectural glazing, machine guards, and laminates

Packaging

- » Weight per Case: Varies per gauge
- » Weight per Pallet: 2,000 lbs.

FORMABLE HARDCOAT POLYCARBONATE

TUFFAK FC is a transparent polycarbonate sheet that has a formable coating on both sides. This abrasion resistant product can be cold formed or drape formed and is suitable for exterior applications. TUFFAK FC has excellent resistance to damage from windborne debris and has outstanding impact strength. This product complies with ANSI Z26.1 Item AS-6 which covers transportation glazing applications.

APPLICATIONS INCLUDE:

Formed industrial applications, face shields, recreational vehicle windscreens

TUFFAK®-15

Extended Abrasion Resistance

EXTENDED ABRASION AND UV RESISTANCE

TUFFAK 15 sheet is a polycarbonate product that offers excellent impact resistance in high risk areas, weathering life, and optical quality. It provides a clear aesthetic advantage over wire glass and metal screens for security glazing and approved for use under NYS-OMH patient safety standards for 0.375" and 0.500". TUFFAK 15 protects against vandalism, forced entry attempts or attacks, and accidental impacts to minimize the risk of theft and glass replacement in damage prone areas. Advanced manufacturing technology has resulted in high optical quality with minimal distortion in clear and standard glazing tints. The abrasion resistant coating, applied to both sides, provides up to twice the life of prior polycarbonate sheet products. TUFFAK 15 sheet has a fifteen (15) year Limited Product Warranty against breakage, yellowing, and loss of light transmission. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Educational, psychiatric and medical facilities, retail and government buildings, and transportation centers at risk from breakage and vandalism

CG375 Containment Grade

CONTAINMENT GRADE POLYCARBONATE

HYGARD CG375 containment grade sheet is a 0.375", 2-ply polycarbonate laminate that is tested to ASTM F 1915, ASTM F 1233, H.P. White TP 0500 for forced entry and EN ISO 23125 (C') for machine tools/turning machines. Unlike glass-clad products, this all-polycarbonate laminate resists spalling and white-out after repeated high force impacts, an advantage in maintaining visibility of a threat during an attack. All HYGARD products incorporate TUFFAK polycarbonate sheet produced for high optical quality in security glazing laminates. Exterior surfaces have a proprietary TUFFAK AR hardcoat that facilitates cleaning and resists marring, chemical attack, and graffiti. HYGARD CG375 sheet has a seven (7) year Limited Product Warranty against coating failure, delamination, yellowing, and hazing. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Jails, detention centers, psychiatric hospitals, reception areas, convenience stores, check cashing centers or facilities, turning machines

CG500 Containment Grade

CONTAINMENT GRADE POLYCARBONATE

HYGARD CG500 containment grade sheet is a 0.500", 3-ply polycarbonate laminate that is tested to ASTM F 1233 Class 1.5 for contraband passage and Class 3.2 for body passage. HYGARD CG500 also tested to H.P. White TP 0500 Level A (.38 Special) and ASTM F1233, Class HG1 (.38 Special) for ballistics and EN ISO 23125 (C³) for machine tools/turning machines. Unlike glass-clad products, this all-polycarbonate laminate resists spalling and white-out after repeated high force and ballistic impacts, an advantage in maintaining visibility of a threat during an attack. All HYGARD products incorporate TUFFAK polycarbonate sheet produced for high optical quality in security glazing laminates. Exterior surfaces have a proprietary TUFFAK AR hardcoat that facilitates cleaning and resists marring, chemical, and graffiti attack. HYGARD CG500 sheet has a seven (7) year Limited Product Warranty against coating failure, delamination, yellowing, and hazing. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Jails, detention centers, psychiatric hospitals, reception areas, convenience stores, check cashing centers or facilities, turning machines

CG750 Containment Grade

CONTAINMENT GRADE POLYCARBONATE

HYGARD CG750 containment grade sheet is a 0.750" thick, 3-ply polycarbonate laminate that is tested to ASTM F 1233 Class 2.4, H.P. White TP 0500 Level B Ballistics (9 mm Luger) and EN ISO 23125 (C³) for machine tools/turning machines. Unlike glass-clad products, this all-polycarbonate laminate resists spalling and white-out after repeated high force and ballistic impacts, an advantage in maintaining visibility of a threat during an attack. All HYGARD products incorporate TUFFAK polycarbonate sheet produced for high optical quality in security glazing laminates. Exterior surfaces have a proprietary TUFFAK AR hardcoat that facilitates cleaning and resists marring, chemical attack, and graffiti. HYGARD CG750 sheet has a seven (7) year Limited Product Warranty against coating failure, delamination, yellowing, and hazing. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Security doors, windows, jails, detention centers, psychiatric hospitals, reception areas, convenience stores, check cashing centers or facilities, turning machines

BR750 Ballistic Grade

BALLISTIC GLAZING - LEVEL 1

HYGARD BR750 ballistic grade sheet is a 0.780", 3-ply polycarbonate and acrylic laminate that meets the UL 752 Level 1 rating for 9 mm ballistic attack. All HYGARD products incorporate TUFFAK polycarbonate sheet produced for high optical quality in security glazing laminates. Exterior surfaces have a proprietary TUFFAK AR hardcoat that facilitates cleaning and resists marring, chemical, and graffiti attack. HYGARD BR750 sheet has a seven (7) year Limited Product Warranty against coating failure, yellowing, and hazing. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Government and detention facilities, banks, specialty retailers, 24 hour convenience stores, cash transaction windows

BR1000 Ballistic Grade

BALLISTIC GLAZING - LEVEL 2

HYGARD BR1000 ballistic grade sheet is a 1.000", 4-ply polycarbonate laminate that meets the UL 752 Level 2 rating for .357 Magnum ballistic attack and HP White TP 0500 Level IV. Unlike glass-clad products, this all-polycarbonate laminate resists spalling and white-out after repeated high force and ballistic impacts, an advantage in maintaining visibility of a threat during an attack. All HYGARD products incorporate TUFFAK polycarbonate sheet produced for high optical quality in security glazing laminates. Exterior surfaces have a proprietary TUFFAK AR hardcoat that facilitates cleaning and resists marring, chemical attack, and graffiti. HYGARD BR1000 sheet has a seven (7) year Limited Product Warranty against coating failure, yellowing, and hazing. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Government and detention facilities, banks, specialty retailers, 24 hour convenience stores, cash transaction windows

BR1250 Ballistic Grade

BALLISTIC GLAZING - LEVEL 3

HYGARD BR1250 ballistic grade sheet is a 1.250", 4-ply polycarbonate laminate that meets UL 752 Level 3 rating for .44 Magnum ballistic attack, HP White TP 0500 Level IV, and ASTM F 1233 Class 5. Unlike glass-clad products, this all-polycarbonate laminate resists spalling and white-out after repeated high force and ballistic impacts, an advantage in maintaining visibility of a threat during an attack. All HYGARD products incorporate TUFFAK polycarbonate sheet produced for high optical quality in security glazing laminates. Exterior surfaces have a proprietary TUFFAK AR hardcoat that facilitates cleaning and resists marring, chemical, and graffiti attack. Applications include security doors, windows, and other areas that require these specific levels of protection. HYGARD BR1250 sheet has a seven (7) year Limited Product Warranty against coating failure, yellowing, and hazing. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Government and detention facilities, banks, specialty retailers, 24 hour convenience stores, cash transaction windows

MS1250 Ballistic Grade

MULTI SHOT PROTECTION

HYGARD MS1250 ballistic grade sheet is a 1.250", 4-ply acrylic and polycarbonate laminate that meets UL 752 Level 6 rating for high speed multi-shot 9 mm (Uzi) ballistic attack and supplementary shotgun rated using rifled lead slug or lead buckshot fired from a 12-gauge shotgun. All HYGARD products incorporate TUFFAK polycarbonate sheet produced for high optical quality in security glazing laminates. Exterior surfaces have a proprietary TUFFAK AR hardcoat that facilitates cleaning and resists marring, chemical, and graffiti attack. HYGARD MS1250 sheet has a seven (7) year Limited Product Warranty against coating failure, yellowing, and hazing. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Government and detention facilities, banks, specialty retailers, 24 hour convenience stores, cash transaction windows

Antimicrobial

ANTIMICROBIAL POLYCARBONATE SHEET

AMGARD clear polycarbonate sheet is formulated with silver ion antimicrobial technology that protects the sheet surface from microorganism growth and remains active for the entire life of the product. When used as protective barriers, AMGARD polycarbonate sheet provides a clear solid partition between individuals. It is easy to fabricate and form for a wide range of interior applications.

TUFFAK® AMGARD sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

- » Inhibits microbe surface degradation
- » Independent laboratory tested
- » Half the weight of glass
- » Does not shatter into sharp-edged pieces like glass
- » Easy to fabricate & clean

APPLICATIONS INCLUDE:

Protective barriers, office partitions, safety enclosures, equipment housings

AMGARD is formulated with silver ion antimicrobial technology to protect the sheet's surface. It is not designed to prevent the transmission of any disease or infectious agent.

Scratch-Resistant Antimicrobial

SCRATCH-RESISTANT ANTIMICROBIAL

AMGARD scratch-resistant polycarbonate sheet is formulated with silver ion antimicrobial technology that protects the sheet surface from microorganism growth and remains active for the entire life of the product. The proprietary coating provides enhanced abrasion resistance to polycarbonate's inherent performance benefits of impact strength and clarity. The scratch-resistant coating also adds exceptional resistance to common disinfecting cleaning chemicals. The result is a highly durable and tough antimicrobial sheet that can stand up to today's demanding safety barrier environments.

TUFFAK® AMGARD-SR sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

- » Inhibits microbe surface degradation
- » Independent laboratory tested
- » Abrasion resistant
- » Chemical resistant
- » Half the weight of glass
- » Virtually unbreakable
- » Easy to fabricate and clean

Packaging

- » Weight per pallet: 2,000 lbs.

Material

Material can be supplied as scratch resistant coated 1 or 2 sides

APPLICATIONS INCLUDE:

Durable protective barriers, office partitions, safety enclosures, interior windows and glazing

AMGARD SR is formulated with silver ion antimicrobial technology to protect the sheet's surface. It is not designed to prevent the transmission of any disease or infectious agent.

MIRROR POLYCARBONATE SHEET

TUFFAK Mirror is a virtually unbreakable mirror product that improves safety and eliminates the hazards associated with broken glass. The high optical quality polycarbonate substrate provides clear mirror images and a first surface coating provides abrasion resistance and durable coating protects the mirrored second surface. The product is lightweight (half the weight of mirrored glass) and easy to fabricate and installation.

- » Virtually unbreakable
- » Approximately half the weight of glass mirror
- » Abrasion-resistant coating
- » Aircraft grade meets FAR 25.853(a) flammability

LIGHT DIFFUSING POLYCARBONATE SHEET

TUFFAK Lumen XT sheet is a translucent polycarbonate product with a textured surface on one side specifically designed for lighting lenses. It features a unique combination of high light diffusion and high light transmission through a combination of optimized surface texture and advanced diffuser technologies.

When compared to other light diffusing products such as glass, TUFFAK Lumen XT sheet has superior impact strength and toughness. Its higher flammability resistance and wider service temperature range provide an additional performance advantage over acrylic diffusers.

The wide range of standard diffusion levels offers designers the flexibility to maximize light fixtures' aesthetics and performance. Other surface textures are available for additional design options.

APPLICATIONS INCLUDE:

Interior LED and conventional lighting fixtures

OUTDOOR LED LIGHTING POLYCARBONATE

TUFFAK DX-NR is a translucent polycarbonate product specifically designed for use as a lighting lens in outdoor applications. The diffuser technology helps to provide uniform luminance and ensures elimination of LED hot spots while maintaining high light transmission. The advanced UV resistance technology provides long lasting weathering performance and the non-reflective texture built into the UV resistant side of the sheet, enhances its aesthetics.

When compared to other light diffusing products such as glass, TUFFAK DX-NR has superior impact strength and toughness. Its higher flammability resistance and wider service temperature provide an additional advantage over other diffusers.

NON-REFLECTIVE HARD-COAT POLYCARBONATE

TUFFAK NR-C sheet is an enhanced UV resistant, non-reflective, one side hard-coated polycarbonate sheet product with a textured hard coat surface which reduces glare normally associated with flat sheet. This hard coating also adds abrasion and chemical resistance to polycarbonate's inherent performance benefits of high impact strength and dimensional stability.

APPLICATIONS INCLUDE:

Display and screen protectors, fuel dispensing systems, signage, lenses, menu boards and other applications requiring a non-reflective surface for improved viewing with reduced glare combined with improved mar and chemical resistance

TUFFAK®-WG

Window Grade

WINDOW GRADE POLYCARBONATE SHEET

TUFFAK WG polycarbonate engineering plate is a UV-stabilized, amorphous sheet. It offers extremely high impact strength, high modulus of elasticity, outstanding dimensional stability, and good mechanical and electrical properties. TUFFAK WG demonstrates low levels of black specks or other impurities.

APPLICATIONS INCLUDE:

Sight windows for tanks/vessels, viewport windows, medical parts, military applications

TUFFAK[®]-MG

Machine Grade

MACHINE GRADE POLYCARBONATE SHEET

TUFFAK MG machine grade polycarbonate is a low stress engineering plastic designed for heavily fabricated, tight tolerance parts. It features extremely high impact strength, high modulus of elasticity, outstanding dimensional stability, and good electrical properties. TUFFAK MG is available in clear and black and is textured on both sides.

APPLICATIONS INCLUDE:

Machined parts, manifolds, insulators, and electrical components

BUS GLAZING POLYCARBONATE SHEET

TUFFAK BG sheet is a hard-coated polycarbonate product designed for exceptional durability. Manufactured to meet demanding bus glazing requirements, this product features abrasion resistance, chemical resistance, and long lasting outdoor weathering performance. The high impact strength of this product provides excellent protection against vandalism, reducing unplanned maintenance and repair. TUFFAK BG meets DOT/FMVSS 205/ANSI Z26.1 Item AS-4 and is available in clear as well as a variety of standard and custom tints.

RAIL GLAZING POLYCARBONATE SHEET

TUFFAK TG sheet is a hard-coated polycarbonate product designed for high optical quality and exceptional durability. The sheet is available in monolithic 0.236" and 0.250" and when used as part of a Dual Glazed system, meets stringent U.S Federal Railroad requirements for impact, ballistic and flammability performance. TUFFAK TG 0.460" meets the FRA requirement as a monolithic product. State-of-the-art manufacturing and inspection processes provide low optical distortion and the advanced hard coat technology provides excellent abrasion resistance, chemical resistance, and long lasting outdoor weathering performance. This product is available in clear and a variety of standard and custom tints. TUFFAK TG is offered with a seven (7) year Limited Product Warranty against breakage for flat vertical applications. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Passenger rail car windows and other transportation glazing

BUS DRIVER GUARD POLYCARBONATE SHEET

TUFFAK DG sheet is a hard-coated polycarbonate product designed for high optical quality and exceptional durability. The sheet is available in 0.236" and 0.375" inches thick with a specified direction of extrusion for proper installation. Manufactured to meet demanding bus glazing requirements, this product features abrasion resistance, chemical resistance, and long lasting performance. The high impact strength of this product provides excellent protection against vandalism and can help reduce driver assaults. The clarity of the glazing enables drivers to interact freely with passengers, while maintaining a high level of protection.

TUFFAK DG meets DOT/FMVSS 205/ANSI Z26.1 Item AS-4, and is NHTSA approved for use as a protective driver partition. The product carries a seven (7) year Limited Product Warranty against breakage for flat vertical applications. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Safety shielding for mass transit bus fleets

TUFFAK®-AF

Anti-Fog

ANTI-FOG POLYCARBONATE SHEET

TUFFAK AF polycarbonate sheet is a two-side coated product that provides long lasting anti-fog properties in addition to the inherent polycarbonate performance benefits of impact strength and clarity. The proprietary coating also provides abrasion resistance and enhanced chemical resistance. This optically clear sheet will retain its anti-fog properties even after repeated cleanings with commercial glass and lens cleaners. The product is available in clear or a range of standard tints. TUFFAK AF polycarbonate sheet has a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available on request.

APPLICATIONS INCLUDE:

Personal protection safety shields, ski goggles, swim goggles, underwater photography equipment, face shields, industrial safety shields and firefighter helmets

**Non-stock Item -

TUFFAK®-IR

Infrared Blocker

IR/UV BLOCKING POLYCARBONATE SHEET

TUFFAK IR is a polycarbonate sheet product developed to meet ANSI Z87.1, EN 169, and CSA Z94.3 standards for face shield applications. Proprietary additive systems block UV and IR light providing protection during gas flame welding and cutting operations and meeting the requirements for welding shades 3 and 5. Polycarbonate's toughness provides outstanding impact performance and state-of-the-art extrusion manufacturing delivers high optical quality needed for face shield applications.

APPLICATIONS INCLUDE:

Face shields for flame welding and cutting and general IR protection

TUFFAK®-M5

Flexible Marine Enclosure

FLEXIBLE ENCLOSURE POLYCARBONATE

TUFFAK Marine 5 sheet is a polycarbonate product designed for applications demanding high optical clarity, exceptional durability, and longevity against the harsh marine environment. State-of-the-art manufacturing processes provide low optical distortion for clear views and unparalleled sight lines. The advanced hard coat technology provides excellent abrasion resistance, enhanced clarity, chemical resistance, and long lasting outdoor weathering performance. TUFFAK Marine 5 maintains its impact strength in extreme temperatures to -30°F. TUFFAK Marine 5 can be easily cut and sewn, making this a more versatile option versus glazing materials that require gluing.

TUFFAK Marine 5 is offered with a five (5) year Limited Product Warranty against micro-cracking, yellowing, and breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Marine flexible enclosures

WELDING CURTAIN POLYCARBONATE SHEET

TUFFAK WC sheet is a polished surface, transparent polycarbonate sheet product designed for welding curtain and screen applications. The sheet can also be used in applications requiring UV light blocking such as screens in tanning salons and intense sunlit areas. It features outstanding impact strength, superior dimensional stability, high temperature resistance, high clarity and it is light weight and easy to fabricate. The sheet protects individuals against intense and harmful light emitted during arc welding. TUFFAK WC polycarbonate sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Welding curtains, screens, booths, enclosures and walkways, tanning salon screens and other extreme UV or visible light areas

Regulatory code compliance and certifications

AWS F2.3M:2011 Specification for Use and Performance of Transparent Welding Curtains and Screens for light transmission properties.

CLASS A PERFORMANCE POLYCARBONATE

TUFFAK CA is an optical grade transparent polycarbonate sheet product designed to meet Class A flammability requirements in the International Building Code (IBC) for interior wall and ceiling finishes. It features outstanding impact strength, high temperature resistance and high clarity and passes the National Fire Protection Association (NFPA) 286 flammability requirements. This UV stable, lightweight, thermoformable, and easy to fabricate sheet is available in smooth and patterns; clear and colors. TUFFAK CA sheet is offered with a five (5) year Limited Product Warranty against breakage. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Class A rated wall and ceiling finishes, coverings, decorative panels, protective coverings, partitions, interior windows, safety barriers, lighting diffusers and interior signage

CLASS A - EXTENDED UV PERFORMANCE POLYCARBONATE SHEET

TUFFAK CA-UV is an optical grade transparent polycarbonate sheet product with extended UV resistance, designed to meet Class A flammability requirements in the International Building Code (IBC) for outdoor architectural applications. It features outstanding impact strength, high temperature resistance, high clarity and passes the National Fire Protection Association (NFPA) 286 flammability requirements. This easy to fabricate 2-sided UV resistant sheet is lightweight, thermoformable and available in clear and standard tints and diffusing colors.

TUFFAK CA-UV clear sheet has a ten (10) year Limited Product Warranty against breakage, yellowing, and loss of light transmission. The terms of the warranty are available upon request.

APPLICATIONS INCLUDE:

Outdoor canopies, pedestrian walkways, bus shelters, greenhouses, barrel vaults

CLASS A - HARD-COATED POLYCARBONATE

TUFFAK CA-AR polycarbonate sheet is a one or two side hard-coated polycarbonate product that is designed to meet Class A flammability requirements within the International Building Code (IBC) for indoor and outdoor applications. The coating adds a higher abrasion resistance and surface hardness to polycarbonate's inherent performance benefits of impact strength and clarity. The proprietary hard-coat also provides chemical resistance and long lasting outdoor weathering performance. This product is available in clear sheet and a range of standard architectural tints.

TUFFAK CA-AR polycarbonate sheet has a seven (7) year Limited Product Warranty against breakage, yellowing, and hazing. The terms of the warranty are available on request.

APPLICATIONS INCLUDE:

Flat architectural applications requiring Class A flammability performance such as interior and exterior windows, pedestrian walkways, canopies, bus shelters, greenhouses, protective wall cladding, partitions and safety barriers

BLACK/WHITE ACRYLIC SHEET

This unique formulation has a beautiful gloss finish and eliminates the need for vinyl to create an eye-catching look. This material transforms from white to black depending on the lighting as well as time of day. It is suitable for indoor or outdoor designs. OPTIX L Black/White is an innovative product that appears black during the day and illuminates white, red, green, blue or other colors at night depending on the color of LEDs used.

This sheet provides two looks with only one product when backlit.

APPLICATIONS INCLUDE:

Same-sign night or day applications, displays, lighting fixtures

**Packaging**

FROST INFUSED ACRYLIC SHEET

OPTIX L Myst is a continuous cast acrylic sheet. This sheet has a chic frosted look that softly diffuses light and add subtle elegance. The frost effect is permanently infused throughout the sheet, which means it is retained through any processing and fabrication technique. OPTIX L Myst works with many light sources. Available in 0.118" and 0.236", it is easy to fabricate, line bend and has an excellent edge finish.

APPLICATIONS INCLUDE:

Advertising display, corporate identity, exhibitions and tradeshow displays, interior design, partitions, Point-of-purchase display, store fixtures and solid surfaces

EDGE LIT ACRYLIC SHEET

OPTIX L Edge Lit continuous cast acrylic sheet is manufactured using an exclusive light diffusion technology. When this sheet is combined with reflective tape and white backing, its lighting capabilities become optimally enhanced. LED, fluorescent or neon light sources may be used to create stunning displays or fixtures. OPTIX L-EL allows users to create ADA compliant signage for interior and exterior applications. The better the light source, the better the panel will illuminate. OPTIX L-EL is available in 0.118", 0.157", 0.236" and 0.315" thicknesses.

APPLICATIONS INCLUDE:

Blade signs, framed signage, ADA compliant signs, displays, lighting fixtures and wayfinding

IR REFLECTIVE ACRYLIC SHEET

OPTIX L Ecoshade continuous cast sheet reflects more than 75% of infrared radiation present in sunlight. This IR reflective sheet reduces heat transmitted through windows and skylights in the summer and decreases heat loss in the winter. OPTIX L Ecoshade is a translucent sheet that changes from iridescent blue to gold when viewed at different angles.

OPTIX L Ecoshade is available in 0.118" - 0.177" and can be used either for interior or exterior applications. Maximum length and width is 108"x 108.25".

APPLICATIONS INCLUDE:

Skylights, windows, doors and partitions
