Elevate Your Build.

At Supersede, we don't just build materials; we build a better future. Our mission is to challenge the status quo by engineering superior, sustainable alternatives to traditional building materials. By leveraging recycled plastics, we aim not only to protect our forests but to turn waste into worth.

Innovating for Earth's Tomorrow.

We repurpose

12M

lbs. of plastic annually

We save over

160K

trees annually

With a

40%

reduction in carbon footprint

Each Supersede product represents a promise — a promise to reduce waste, save trees, and lower emissions.
